

E-CIGARETTES MALAYSIA

WHAT IS AN E-CIGARETTE?

It looks like a cigarette, it feels like a cigarette and it satisfies you like a cigarette. However, Electric Cigarettes **DO NOT** contain tobacco or the other harmful substances in regular cigarettes. That means carcinogenic substance like tar, formaldehyde and carbon monoxide are not inhaled which reduces the risks of cancer and other diseases commonly associated with smoking.

The only working substance in the E-Cigarette is nicotine. E-Cigarette cartridges come in several different strengths which means you can control the nicotine content. Smokers wanting to kick the habit completely will find this is a great way to handle cravings.

The e-cigarette is great for/when:

- E-Cigarette **DOES NOT** contain the over 4000 **POISONOUS** substances and **harmful CHEMICALS** found in real cigarettes that cause heart attack and cancer, such as tar, carbon monoxide, acetone, sulfuric acid and more.
- You can ENJOY the E-Cigarette in places where regular cigarettes are PROHIBITED, even in bed and malls. We have personally tried it and no one was offended. We've only received weird looks.
- E-Cigarette **costs less** than real cigarettes in the long run.
- E-Cigarette eliminates the dangers of second-hand smoke, so you can smoke around others without causing ill effects. While there may be a faint scent for a few seconds, there is virtually **NO smell** as the vapor quickly vanishes.
- Eliminate the nasty smell, messy ashes and cigarette butts.
- Eliminate bad breath and smoke odor on your body and clothes, as well as in your home and car.
- My wife practically has nothing more to say about my smoking habit. I should have gotten this years ago!

HOW DOES AN E-CIGARETTE WORK?

When the user inhales through the device, the air flow is detected by a sensor. A microprocessor then activates an atomizer, which injects tiny droplets of the liquid into the flowing air and vapourises the nicotine. This produces a vapor mist which is inhaled by the user (refer to the picture above!). The microprocessor also activates an orange LED at the tip to simulate real smoking.

REFILL CARTIDGES

One refill cartridge is equivalent to more than 300 mouthfuls of an ordinary cigarette. This is equal to about 20 – 30 cigarettes (1 to 1.5 boxes) This may vary according to individual. Again, be wary of certain models where their refills may last only up to 150 mouthfuls or less. They may sell their starter kits at a lower price but will make long term profits from your frequent refill purchases!

WHAT DO I GET IN A STARTER KIT?

Our starter kit is ready to use with:

- A Complete Electronic Cigarette Set
- Two rechargeable batteries
- A charger for these batteries

FREQUENTLY ASKED QUESTIONS

Q. How do I choose an E-Cigarette/ E-Cigarette seller?

A. We carry the most trusted and reliable E-Cigarette in the market today. It has a longer battery lifespan and its refill lasts the longest compared to all others in the market now. You get to save more when your refills last longer! Beware of those who promise fancy versions of the e-cigarette but they in fact have up to 50% less battery and refill lifespan. These people want to raise their profits by tricking their customer into making more frequent purchases of refills. Go for quality and reliability because that is what we promise to deliver!

Q. What is included in a Starter Kit?

A. Our starter kit is ready to use with 2 batteries, 1 atomizer, 5 Free refill cartridges and 1 charger.

Q. Are E-Cigarettes safe to use?

A. E-Cigarettes are approved in the US, UK, China and several European and Middle East countries. It is also CE and ROHS certified and compliant. Millions of units have been sold throughout the years since 2004.

Q. Does the vapor smell?

A. The vapor is exhaled and appears like smoke, but does not smell. It is in fact, vapour mist that evaporates in seconds. The liquid nicotine contained in the cartridge does have a slight smell of the flavor of the cartridge.

Q. What are the nicotine levels?

A. Our nicotine refill cartridge comes in medium and high nicotine levels. We have found that Malaysians do not want any strength lower than medium. However, other strengths can be custom ordered

Q. What flavors are available?

A. We offer Tobacco and Mint flavored nicotine refill cartridges only as we find that real smokers in Malaysia only prefers these two. However, other flavours can be custom ordered.

Q. How long does one refill cartridge last?

A. Each refill cartridge lasts the equivalent to 20 cigarettes. Once the cap from a cartridge is removed they can dry out over time. Also, individuals tend to have different inhalation habits and therefore the exact time a cartridge lasts will vary by user.

Q. How will I know when a nicotine cartridge needs to be replaced?

A. When inhaled, no vapor will be present. Upon checking, the liquid in the cartridge is dry. This will let you know you need to replace the cartridge.

Q. Do you need to turn on the electronic cigarette?

A. No, when inhaled the electronic cigarette will automatically activate. There is no on/off switch.

Q. How long does a battery last?

A. The battery life will vary greatly with use, but on average 1 to 3 days under normal use. The electronic cigarette comes with 2 batteries and a charger so you never need to go without your electronic cigarette.

Q. Will the electronic cigarette help me quit smoking?

A. There is no guarantee that using the electronic cigarette will help you quit smoking, but many have had success using it.

Q. My E-Cigarette is not working as it should. What should I do?

A. Any electronic device needs some kind of maintenance. Over time, the atomizer might be flooded with liquid. Every few days, unscrew the atomizer and drain it overnight by turning it upside down on a piece of paper towel. Put the part facing the battery on the paper towel. You can even choose to do this every night before you go to bed. Your sales agent will demonstrate this to you upon purchase. Contact your sales agent if you still face any problems.

Q. Is there a warranty?

A. Our products come with a 3 month immediate replacement warranty.

Q. Where do I buy and should I get a set?

A. Our products are distributed throughout Malaysia by specially trained Distributors. If you are a minor below 18 years of age, you will not be allowed to purchase from us.
