Overview

The **Microsoft Certified IT Professional (MCITP)** credential validates that an individual has the comprehensive set of skills necessary to perform a particular job role, such as database administrator or enterprise messaging administrator. MCITP certifications build on the technical proficiency measured in the **Microsoft Certified Technology Specialist (MCTS)** certifications. Therefore, you will earn one or more MCTS certifications on your way to earning an MCITP credential.

MCITP candidate profile

MCITP candidates are capable of deploying, building, designing, optimizing, and operating technologies for a particular job role. They make the design and technology decisions necessary to ensure successful technology implementation projects.

Why get certified?

Earning a Microsoft Certification validates your proven experience and knowledge in using Microsoft products and solutions. Designed to be relevant in today's rapidly changing IT marketplace, Microsoft Certifications help you utilize evolving technologies, fine-tune your troubleshooting skills, and improve your job satisfaction.

Whether you are new to technology, changing jobs, or a seasoned IT professional, becoming certified demonstrates to customers, peers, and employers that you are committed to advancing your skills and taking on greater challenges. In addition, certification provides you with access to exclusive Microsoft Certified Professional (MCP) resources and benefits, including opportunities to connect with a vast, global network of MCPs.

Build your expertise and advance your career. By earning a Microsoft Certification, you gain advanced, market-relevant skills that employers recognize and respect as well as opportunities to connect with a global community of other certified professionals. Additionally, certification provides you with access to exclusive Microsoft resources and benefits, such as the MCP member Web site, career-building tools, and training. Explore the benefits of certification—and start your journey to attaining your ideal career.

"Because I'm certified, I stand out with employers. They see me as the person who is very ambitious, who loves to do what he does. And that's true. I'm that person!"

Earning a Microsoft Certification not only helps you stay current with the latest Microsoft products and platforms, it demonstrates your specific job-related experience and technical problem-solving skills.

"Forty-three percent of survey respondents report salary increases as a result of Microsoft Certification."

– Redmond magazine 2006 survey of Microsoft IT professionals compensation
