Current Market: 1.2740

Entry: 1.2700

Stop Loss:

Target:

BUY LIMIT (ENTRY)

Current Market 1.2740

Buy Limit (This is our Entry)

Disclaimer: The materials on this page are intended for informational purposes only and are not intended to be, nor should it be interpreted as, investment advice, recommendation or opinion.

www.mbtrading.com/fx

Notes: When placing a buy limit entry, when limit price is below the current offer (ask). Execution occurs when offer moves down to limit price.

Trader would like to go long, and enter in immediately without entering in a market order. Order is filled at limit price or better.

Current Market: 1.2700

Entry: 1.2740

Execution: @ Limit price or better / 1.2740 or lower.

Buy Soft-Limit Entry (Use Limit Order)

Notes: Used to enter into a fast moving market instead of entering with a market order. Limit order placed when limit price is above the current offer (Ask), execution will be at your limit price or better. In this case your limit price or lower. Price Vs. Speed setting in the Preferences – Order Entry applies to limit orders only. If the arrow is left on Price, order route will work harder to fill against a price closer to the best offer (Ask). On the other hand, if the arrow is left towards Speed order route works harder to give execution faster, whereby your order will be filled anywhere between your limit price and the best offer (Ask).

Entry (LIMIT PRICE): 1.2735

Stop Loss (Lower TTO):

Target (Upper TTO):

BUY STOP LIMIT

Disclaimer: The materials on this page are intended for informational purposes only and are not intended to be, nor should it be interpreted as, investment advice, recommendation or opinion.

www.mbtrading.com/fx

Notes: Initially places a stop limit order (either a buy or sell), which works like a Stop Market order with one major exception. Once the order is activated (by the currency trading at or through the stop price), it does not become a market order. Instead, it becomes a limit order with a specified limit price. Your order fill price will be either at your specified limit price or better.

Trader would like to go short below the current market price. If entry price is not hit, it stays pending until order is cancelled.

Trader would like to go long above the current market price with a trailing stop.

Current Market: 1.2700

Entry: 1.2730

Stop: 15 PIP Trailing Stop

Target: Will go until trailing stop is hit or cancelled by trader.

STOP + TRAILING STOP

Disclaimer: The materials on this page are intended for informational purposes only and are not intended to be, nor should it be interpreted as, investment advice, recommendation or opinion.

www.mbtrading.com/fx

Notes: Ride a currency's price trend, and make potential profit from its movement, and limit your downside risk without constantly monitoring prices. Trailing stops move your stop price with the price of the currency and are server-sided, protecting you in the event you lose Internet connection.
