Buttons: Load, Save, OK, Cancel, Reset

You must enter Server Time few minutes or 1 minute before news impact.

Server Time in Hour and Minute before News/Speak/Gap in form of **HH:MM**

e.g if NFP news start at **16.30** Server Time. Just Enter **HH = 16** and **MM = 29**. 1 minutes before News impact.

On the Screen Information you will see Local Time and Server Time. So you can enter the time as per Server Time.

Expiry Pending Order in Seconds

Because of high momentum price impact during News or Speaks so you must enter Pending Order (PO) Expiry time in seconds after PO was place. Normally is 65-70 seconds. 60 seconds after place PO and 5-10 seconds after news impact. So it's become 65-70 seconds expiry time.

After expiry time is over Automatically the PO will be deleted by EA.

Expiry Open Order in Minutes

Once you price move trigger the PO. Order is open either Long (Buy) or Short (Sell). Once its open either you can manually close for profit or wait till the price reach your Take Profit (TP).

Some Broker not honor your trade if your open trade is less than 3 minutes. So the Open Order Expiry take action from here to fulfill broker requirement.

Starting Lot Size and Incremental Percentage (Martingale) Lot Size.

Please input your trading Lot size here. **Min 0.01** and **Max 100** (Depends on your broker).

Please input your Percentage Incremental Lot Size (Martingale) in **Percent %** (Default is 10%).

Distance from Current Price (Point)

Enter distance in Points from current price. To make sure that your PO wont trigger before news impact. Normally the distance for News is between 75 – 150 points. For Gap Trading in the weekend will be from 125-180 Points. (Depends on the spread of that particular time).

Distance between Order in Points

Enter grid @ layer distance or gaps from each other in points. This EA can support from minimum 1 point until maximum as you require. Normally enter it from 25 – 100 points gap.

Total Number of Trades

Enter the number of PO as you wish to open. Advisedly to open from min 2-10 for normal News.

For gap trades as you wish, depends on how far the price will move during the weekend based on the fundamental analysis.

Trade Take Profit (TP) / Increase Take Profit (TP) / Stop Loss (SL)

Please enter the require field as you think is suitable for your trading needs.

Break Even (BE) Movement Start (Points)/ (BE) Percentage Lock

This entry will replace your Stop Loss (SL) once price move above the BE points. If you enter the percentage of Lock Profit then your BE will be Percentage X BE Movement in Points. Instead you got zero profit or loss you now will have few profit in case the price spike to the other side or retrace below your entry price.

Magic Number

Magic Number is Standard EA Identifier for EA to recall the history of trades and current trade.

Sell/Bull PO

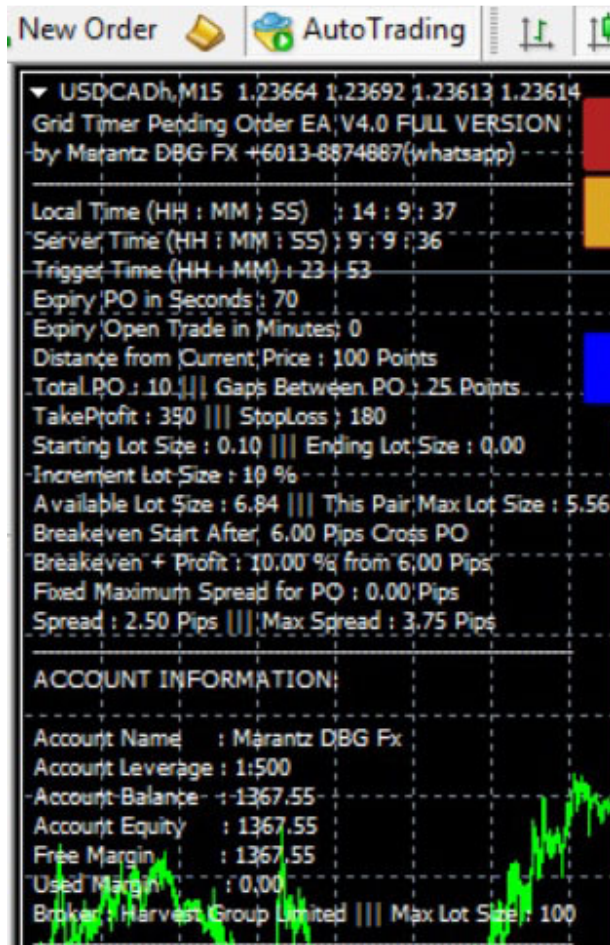

Set it "true" if you wish both side to open order. You also can enable one side only by setting the other side "false".

Maximum Spread

If you wish to filter your trade by certain number of spread in points, please enter this field otherwise leave it at 0 as default.

Maximum Allowed SlipPage

Slip page in pips that allow EA to trade in case price movement. Default Slippage is 3 pips.

Once install the EA

This information will appear on the Screen Chart

As your entry information in Input Control Panel.
