

about

Conventional training becomes the privilege of those who can effort to pay for it, training these days comes with exorbitant training fees, lodging precious time for many companies who could not spare their work personnels .

Lifelong learning should be widely encouraged for working adults to enhance their skill development, with rapid progress in global competitive industries lifelong learning should become a non – timetable asset to further spur knowledge and human capital for the economy of the nation.

Online learning could facilitate participants to pick up the pace in knowledge and will make the workforce more productive while the expense to study is cost effective.

service

Throughout the world inline education or distance learning is becoming cost effective these days. It has helped everyone to access knowledge and skill who can contribute to nation's economy.
